Passo 1

1. Vá para <https://www.anaconda.com/download/>
2. Baixe o anaconda
3. Instale o anaconda(selecione as opções marcadas na imagem para instalar)

Passo 2

Abra o anaconda prompt
como administrador

Passo 3

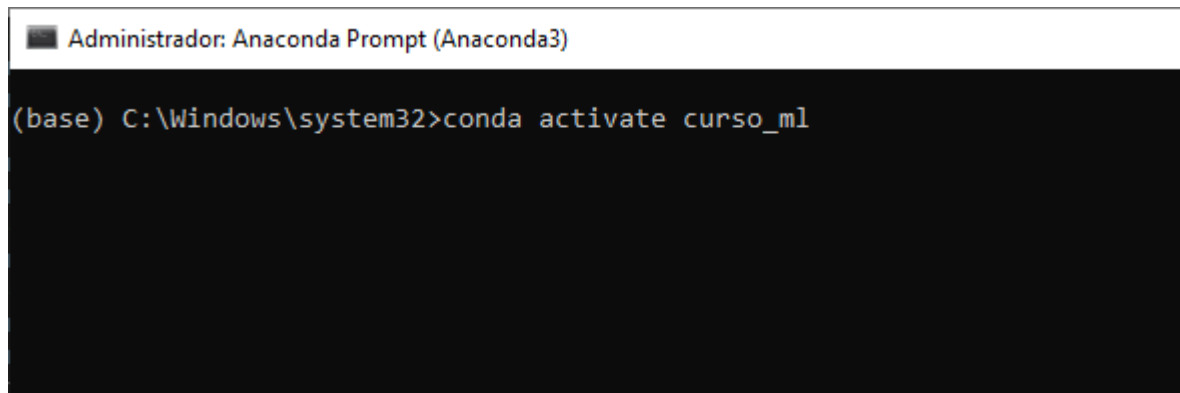

No prompt digite `conda create -n nomequequeresproambiente python=3.9`

Administrador: Anaconda Prompt (Anaconda3)

```
(base) C:\Windows\system32>conda create -n curso_ml python=3.9
```

Passo 4

Ative o seu environment digitando conda activate nomedoenvironment

```
Administrador: Anaconda Prompt (Anaconda3)

(base) C:\Windows\system32>conda activate curso_ml
```

Passo 5

Vá até a pasta onde baixou os requirements.

Utilize o comando `cd` para isso.

Ex: `C:\Users\dpatricio\Downloads`

Passo 6

Digite no terminal do conda `pip install -r requirements_final.txt`
